

Transforming Waste into a
Sustainable Future

Recyclers

DAO

Unlocking the Power of
Decentralization for AI Recycling
and Waste Identification

Problem

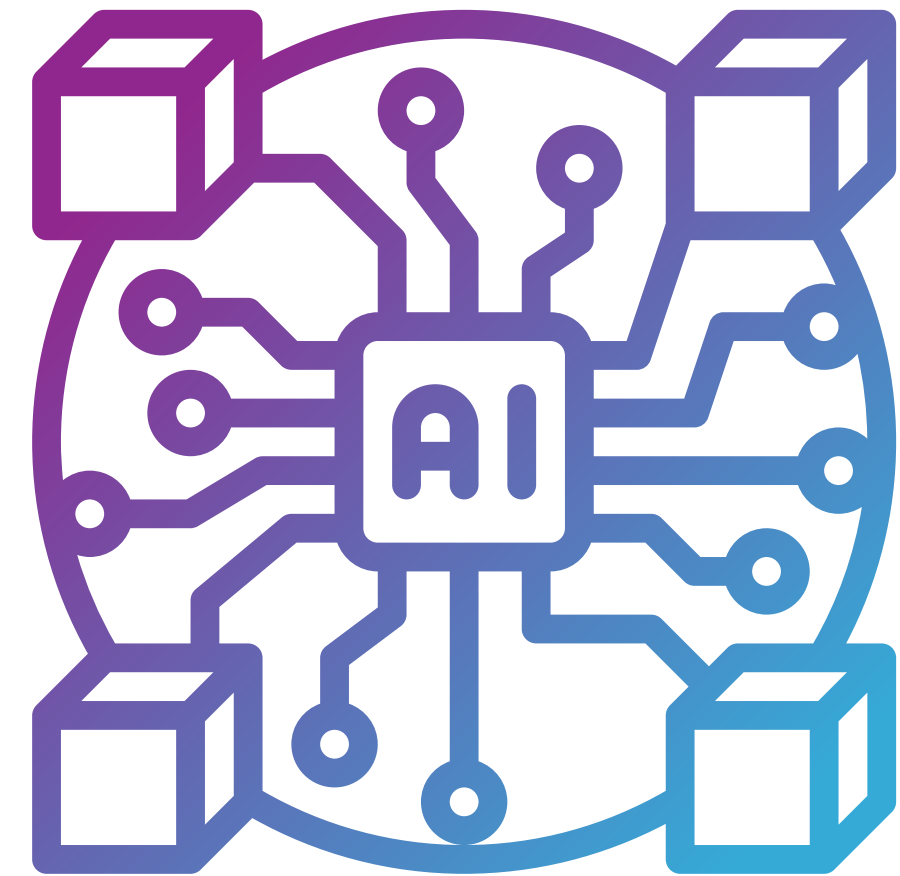

The world is drowning in waste, and recycling is a vital solution. However, the effectiveness of **recycling programs** relies on accurate waste identification, which is often a **laborious** and **error-prone** process.

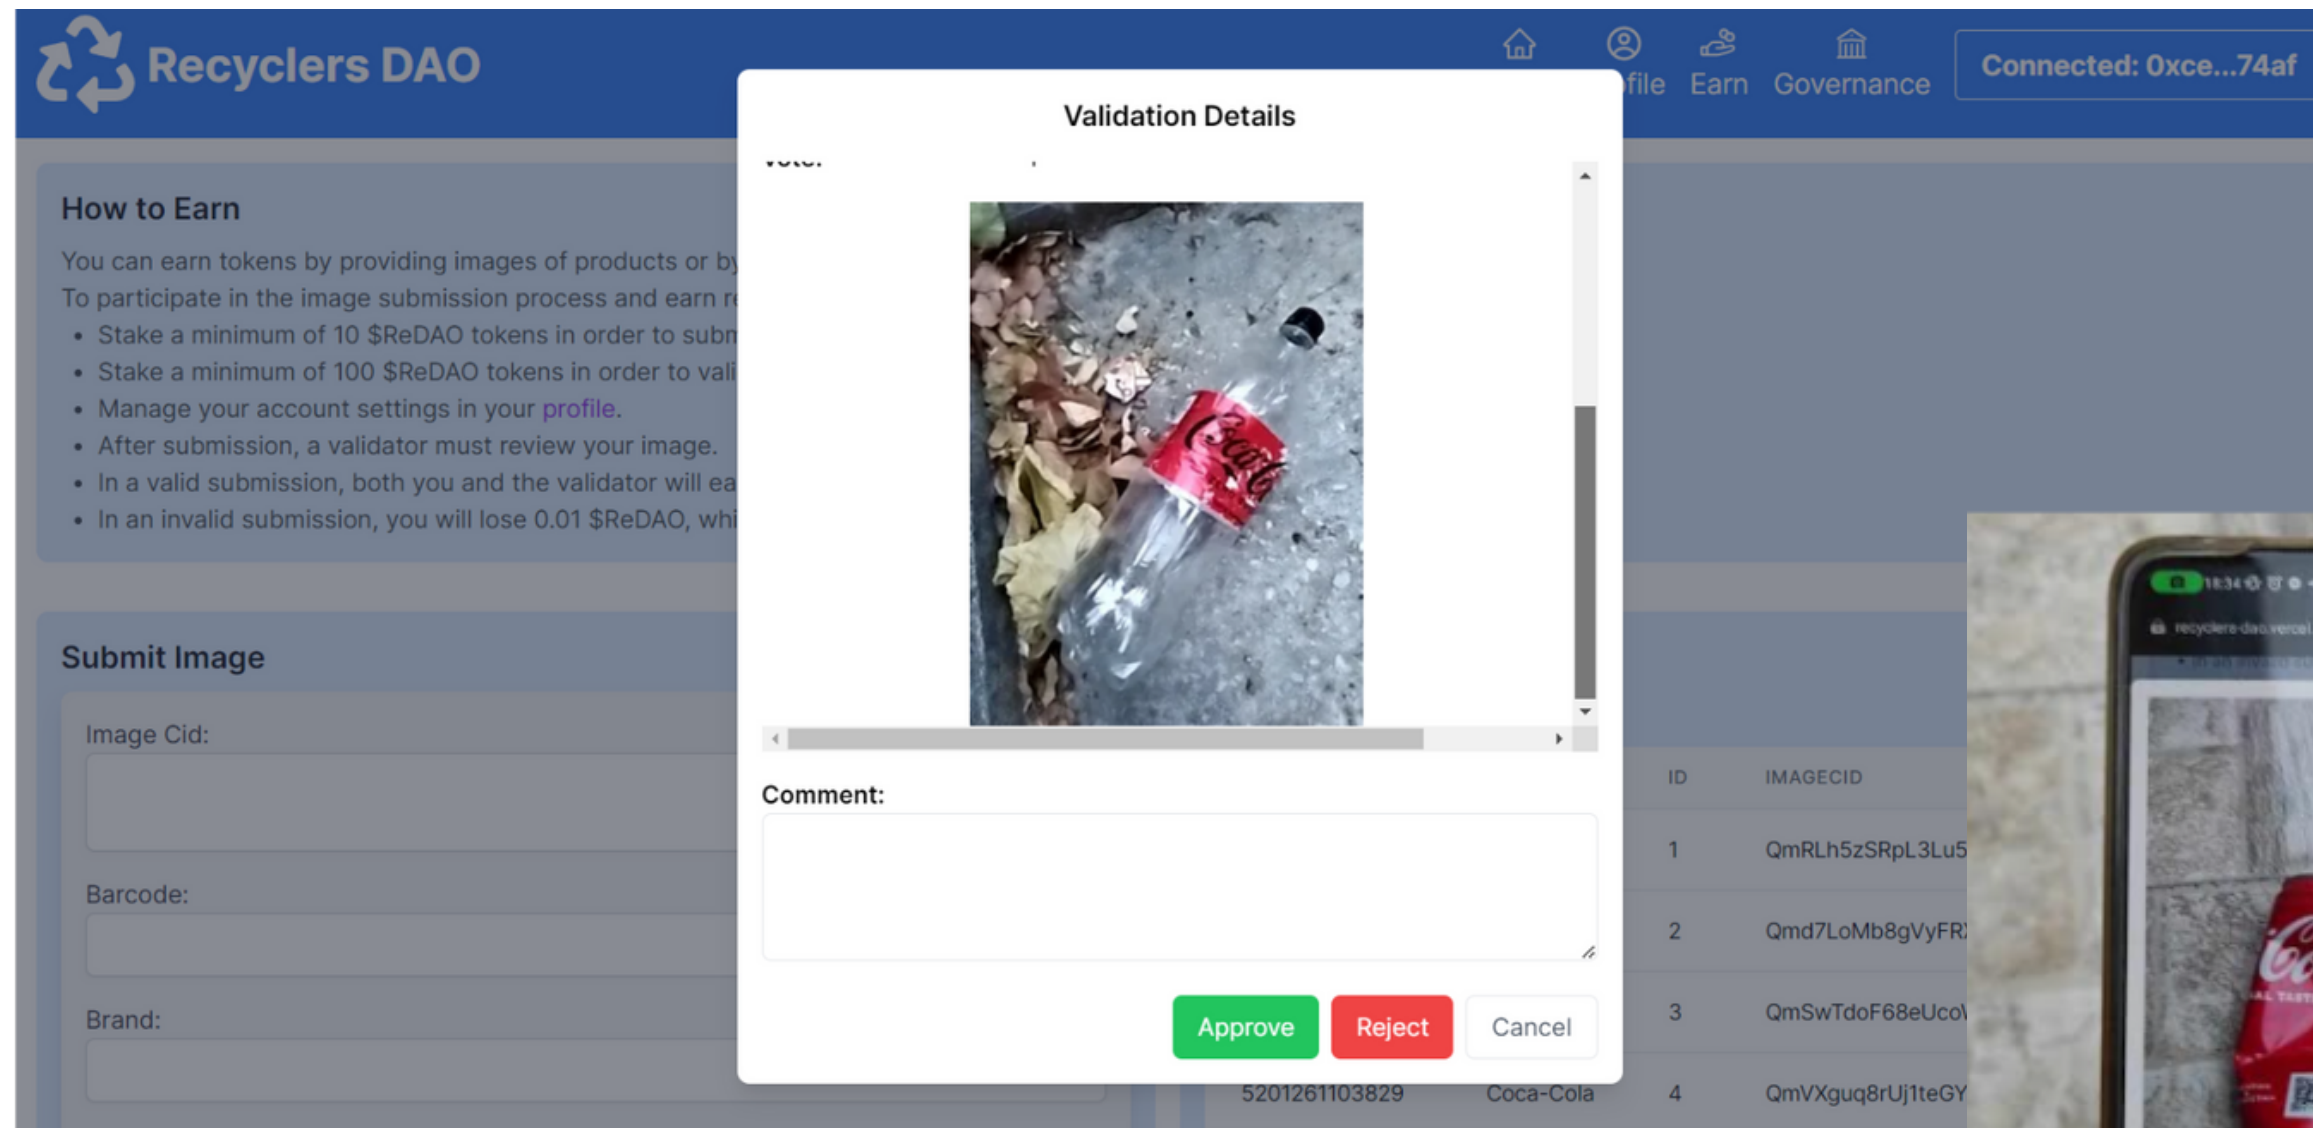

Solution

Leverage the power of blockchain & AI to build the largest **Waste Identification Classifier**

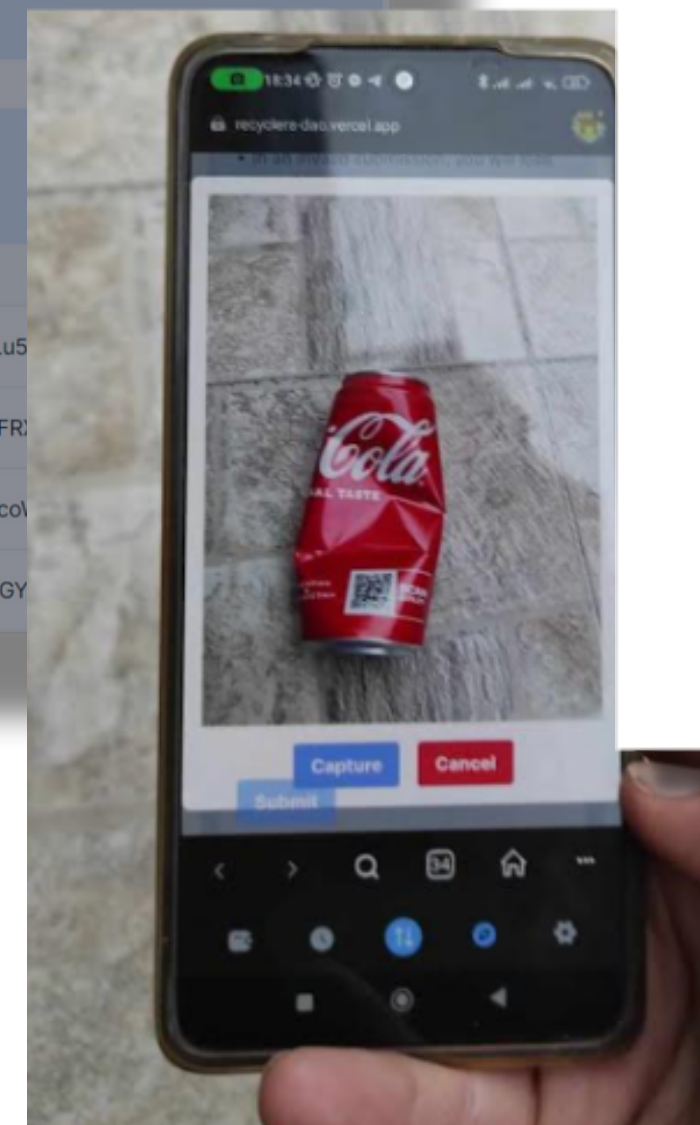

Create a decentralized Blockchain-powered platform that empowers individuals to contribute to AI waste identification and recycling efforts while earning rewards.

Our advantage

- Image identification:
 - for waste products in any condition
 - for recycling product lines
 - for any location
- Global data set - global use cases
- Global community owned
- Cultivates Eco Culture & Research
- Promotes CSR environmental campaigns

Roadmap

1

Crypto Socials

Expand to social media and collect 1.000.000 images

2

1st AI detector

Create 1st Waste detector prototype

3

Waste Sorter

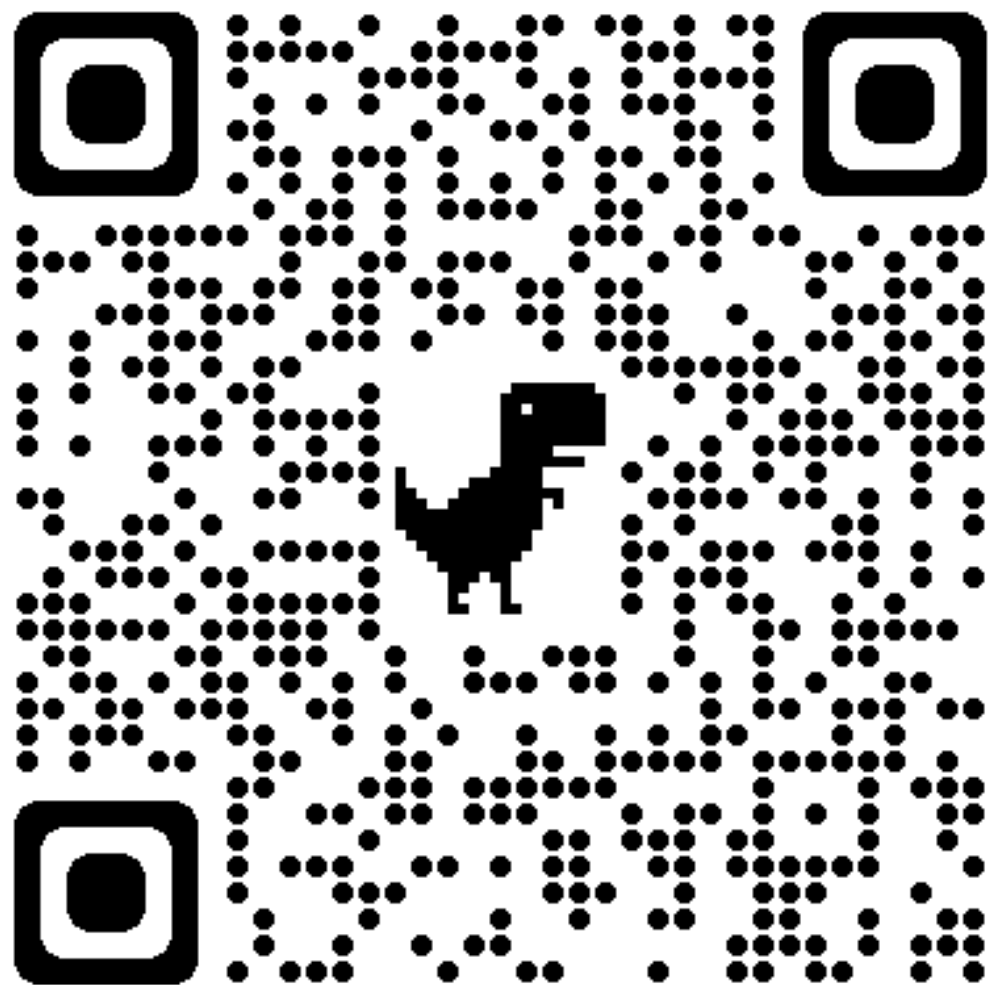

Build 1st recycling sorter

4

Brand CSR

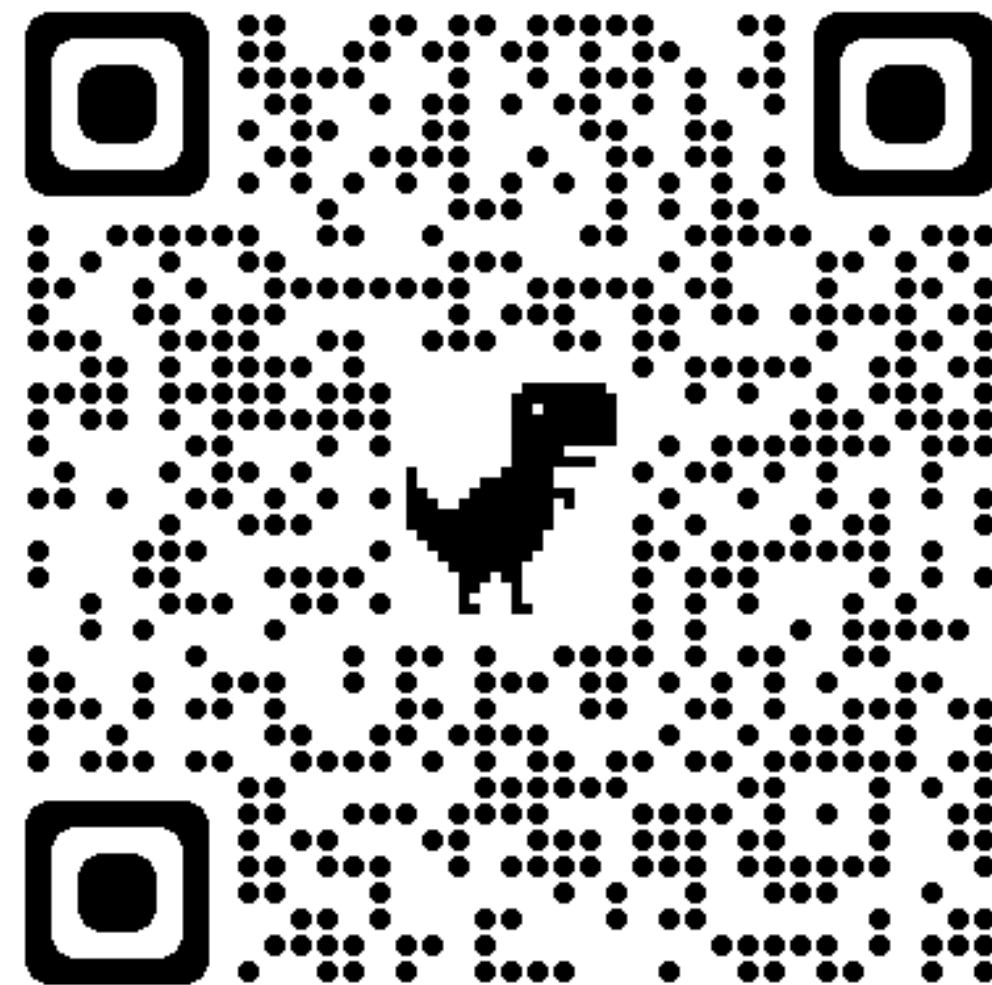

Run 1st brand csr campaign
